SPOTLIGHT ON STAIRS

FUNCTIONAL

DESIGN AS A DAILY

EXPERIENCE

www.metallart-stairs.com

Stairs are more than just an object for daily use, as their prominent role inside (or outside) a building proves. They are often the one element of a building that most strongly expresses its owner's style. MetallArt stairs always provide aesthetic pleasure while meeting all of the functional requirements. If you would like our help, our in-house design office, staffed by creative technicians, engineers and architects, can help you to express your individual style.

As a specialist in producing premium customised stairs, MetallArt has been creating individual solutions for discerning customers for over 30 years. This is why we offer consulting services, 3D construction, structural engineering services and production in a "one-stop shop". With a passion for realising innovative solutions and new standards in manufacturing we design steel stairs at the highest level.

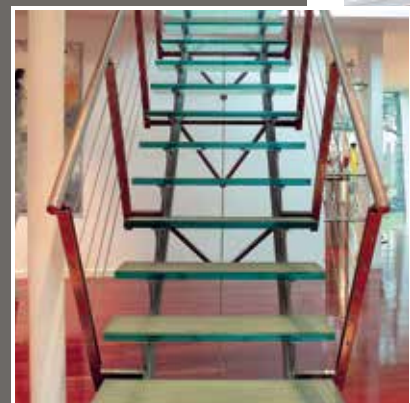

STAIR-TYPES

- curved stairs
- free forms
- straight stairs
- quarter and half-turn stairs

STAIR-STRUCTURES

- stringer stairs
- newel stairs
- single-stringer stairs
- saw-tooth stairs
- folded stairs
- cantilevered stairs

MATERIALS

- stainless steel
- steel
- aluminium
- wood
- glass
- stone

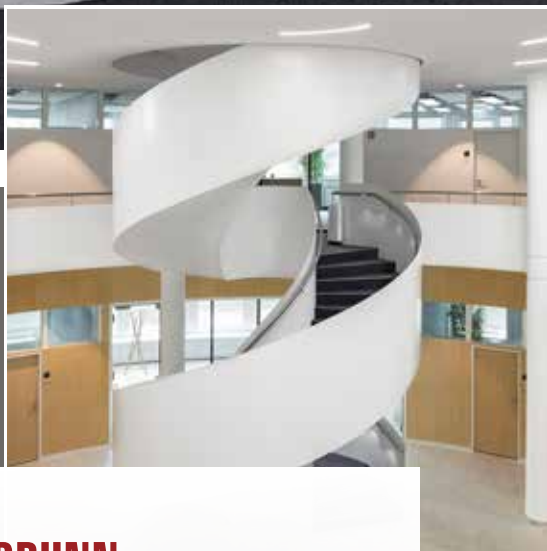

SPIRAL STAIRCASE // BAD WIMPFEN

spiralled flat-steel stringer stairs with a bridge // trough-type treads // tread cover made of solid European oak // railing with double flat-steel balusters // profiled wooden handrail // parallel running chords made of flat steel

TRUMA // PUTZBRUNN

Curved flat-steel balustrade stringers // stainless steel handrail on the inside // bores at the handrail at the outer stringer for a selective energy-saving LED illumination in neutral white, spaced according to the steps

STRINGER STAIRS // CONSTANCE

elliptically curved stringer stairs // parapet-high steel stringers // folded steps // underside soffit made of steel

FUNKY // MUNICH

inner string designed as a steel balustrade with indirect LED lighting // outer string designed as box string // smooth underside cladding // marble folded steps // Corian gallery railings with a steel core // all-glass railing with a high-gloss polished stainless steel handrail

**METALLART STAIRS

**PRODUCED IN SALACH.
SOLD IN GERMANY.
USED ALL OVER THE WORLD.**

120 highly qualified employees work at our 7,000 m² production plant in Salach to make your individual MetallArt stairs, creating quality “made in Germany” using the latest manufacturing technologies: CAD-controlled 5-axis processing centres and laser equipment, as well as rolling and bending machines.
